

# Cosactive NMF

Mimetic "Natural Moisturising Factor"

Cosactive NMF is a mixture of humectants in aqueous solution to replace the "Natural Moisturising Factor" (NMF) of human skin. It is particularly suitable for use in hydroregulating cosmetics and anti-ageing products because it is formulated free of listed preservatives. This transparent, low-odour solution is suitable as an additive for hydroregulating cosmetics of all kinds.

## Processing

Ideally, it is added with the active ingredient phase below 40°C.

## Recommendation application concentration

1-10%

## INCI

Aqua, Sodium Lactate,  
Sodium PCA, Pentylene  
Glycol, Glycine, Inositol,  
Lactic Acid, Niacinamide,  
Urea

---

## Cosactive NMF - the ideal moisturiser

This mimetic skin moisturiser can be perfectly combined with well-known moisturisers and prolongs their effect.

As a sole moisturiser, it is perfectly suited for use in high-quality cosmetics as a skin-mimetic moisturiser.

Also ideal as a booster product for your skincare line!
