

Cosactive Olus Oil

Natural alternative to petrolatum – light, plant-based & multifunctional

Cosactive Olus Oil is based on 100% plant-based triglycerides and is a highly compatible, multifunctional emollient. It offers the occlusive and protective properties of petrolatum, but in a lighter, more contemporary formulation.

This makes Cosactive Olus Oil the ideal choice for modern, sustainable cosmetic products that rely on renewable raw materials and offer outstanding performance.

Areas of application and formulation ideas

Skin care: Protects against moisture loss, ensures soft, smooth skin.

Hair care: Adds shine and nourishment, improves adherence.

Baby care: Soothes and protects, ideal for nappy care.

Colour cosmetics: Improves binding in powder formulations, gives lips shine.

Sun care: Reduces stickiness, ensures a pleasant skin feel.

Advantages

Skin feel: Rich, softening and non-sticky.

Oxidative stability: Due to low iodine and acid values.

Very good skin compatibility: Free from allergens, virtually odourless and colourless.

Processing

Ideally, Cosactive Olus Oil should be added to the fat phase at up to 80°C and melted.

Recommended concentration
1-100%

INCI

Olus Oil

Cosactive Olus Oil combines the protective power and lightness of plant oils – for sustainable formulations that are equally beneficial to the skin, hair and the environment.
