

Cosactive Hyaluron Gel 4

Cosactive Hyaluron Gel 4 is an active ingredient mixture of 4 different hyaluronic acids.

Cosactive Hyaluron Gel 4 contains long and short-chain hyaluronic acid as well as acetylated hyaluronic acid and a hyaluronic acid crosspolymer. This mixture enables a wide range of applications, particularly for anti-ageing products, which are intended to provide both an immediate effect and a long-lasting, film-forming effect.

The active ingredient mixture is already dissolved in an aqueous solution, making it easy to use. It can easily be used in emulsions, serums or products containing surfactants and does not leave the skin feeling sticky

Particularly suitable for the following product features:

- Skin moisturisation
- Support for collagen synthesis
- Film formers

Processing

Cosactive Hyaluron Gel 4 can be weighed into the water phase or added at the end of the manufacturing process before cold homogenisation.

Recommended concentration

1-10%

INCI

Aqua, Pentylene Glycol,
Sodium Hyaluronate,
Sodium Acetylated
Hyaluronate, Sodium
Hyaluronate Crosspolymer,
Magnolia Officinalis Bark
Extract, Paeonia Lactiflora
Root Extract

Cosactive Hyaluron Gel 4- a booster for every facial care product

With Cosactive Hyaluron Gel 4 you have a simple solution for every skin type and every product line. The moisturising effect of Cosactive Hyaluron Gel 4 in both the upper and deeper layers of the skin makes it indispensable for a sophisticated skincare line. It also supports collagen synthesis and refines the skin's appearance.
